# Geometric Table Wood

Designer: Alain Gilles

The Geometric Table Wood, designed by Alain Gilles, is now available in the new ebony finish, thanks to which it assumes a decidedly sculptural appearance. Geometric Table Wood catches the eye thanks to its shape, in particular that of its legs. It is a transforming shape-shifting table that changes the perception of its figure by playing on perspective: with a

hypnotic visual effect, it looks different depending on the point of view, thanks to the drop-shaped silhouette of the four legs. The scenic presence of the Geometric Table Wood is further enhanced by the ebony used to make both the top and the legs, as if the table were carved from a single block of wood.
