

BONALDO

AX console

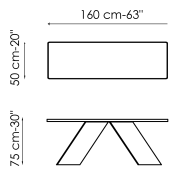

Geometric, rigorous and linear. To enhance the simplicity of its shape, the AX console focuses on the essential: the two painted metal “sheets” cross one another and support the top, which itself proposes the lines and corners of the AX table by which it is inspired. A form lacking any superfluous elements, highlighting the rationality and rigorous purity of the signs of this collection: the allure of the material contrast between top and

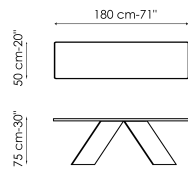

legs enhances the purity of the design and the hand-crafted excellence of Bonaldo. The top of the AX console is available in various choices of wood or in ceramic. A precious furnishing element that has its place in the sign of contemporaneity also thanks to the excellence of its overall design and the materials used. Combined with the AX table, it makes it possible to create environments with coordinated style.
